Friday 17<sup>th</sup> May 2024

Hello everyone

This week started with a very spring like walk through sunshine and showers to collect wildflowers for our summer display. We found plenty of cow parsley, ragged robin and buttercups. Some of the children spent time flower arranging when they returned to the nursery and some used the flowers to create potions. We have had lots of interest in numbers this week and children have been making number signs to put on the bikes and using tape measures to measure objects around the Nursery.

Have a wonderful weekend everyone.

Katherine and the Team.

## **Hand Foot and Mouth**

We have had cases of Hand Foot & Mouth disease at nursery. This is a common childhood illness that can also affect adults. It usually gets better on its own in 7 to 10 days. Please keep an eye on your children for symptoms. Here is a link to further information including recommended treatments and exclusion periods - <https://www.nhs.uk/conditions/hand-foot-mouth-disease/>

## **Breeze blocks or similar wanted please.**

Does anyone have any spare breeze blocks (or similar) they could donate to Nursery? We need to create a base underneath a small outside storage shed for our garden tools and equipment.

## **New Home for our Guinea Fowl chicks.**

This week, we said goodbye to our guinea fowl who have returned to Teds farm where they will stay together and have a lovely life with Ted and his family. A huge thank you to the family for letting us hatch out eggs for them it has been a truly magical experience for children and adults!
